1515-1530 Afternoon Tea, Trade & Posters			
1530-1630	Plenary		
1530-1630	Hypothetical	What to expect: The First Hypothetical moderator was Socrates, who walked around the market place posing imaginary situations and asking ancient Athenians how they would react – and, more importantly, why. He used 'hypotheticals' first to find a rationale for real life action, and then to examine whether the rationale could be applied to other similar cases: whether it could serve as a general principle. "Hypotheticals" have no scripts or prompts or rehearsals: the key to the exercise is its spontaneity.	
1630-1645	Presentations		
1645-1700	Close		

ACCOMMODATION OPTIONS AT SYDNEY OLYMPIC PARK

Those marked with a “Winds of Change” logo are offering 10% discount to delegates – you will receive the specific code for the discount with your confirmation of registration.

Keynote Speaker

Professor Bernie Carter – FRCN, PhD, PGCE, PGCE, BSc, RSCN, SRN

Bernie is Professor of Children's Nursing at the University of Central Lancashire and Director of the Children's Nursing Research Unit at the Alder Hey Children's NHS Foundation Trust in Liverpool. She is also a Visiting Professor at Edge Hill University. Her clinical practice was primarily within neonatal and children's intensive care and her PhD focused on preterm babies and their pain. She was awarded a RCN Fellowship in 2009.

Bernie's research interests are eclectic but focus on the impact of pain, chronicity and complex health care needs on the lives and life transitions of children and young people and their families. Bernie's research is primarily qualitative and child- and family- centred in nature. More specifically, it is narrative, appreciative and collaborative in its approach. She utilises a range of data generation techniques consonant with children's ways of expression including visual art based techniques and photography as well as interviews, focus groups and workshops. She aims to generate insights into and understandings about children's lives. She believes that this will assist professionals in providing care that attends to the resilience, competency and capacities of children as well as their concerns and needs.

Invited Speakers

**Elizabeth Koff
CEO Sydney Children's Hospitals Network**

Elizabeth commenced her health career as an Allied Health professional, gaining 13 years clinical and management experience in a number of teaching hospitals in NSW and Victoria. Following completion of a Master of Public Health at Monash University in 1994, Elizabeth returned to the NSW health system and has held a number of planning and service development roles. In 2001 Elizabeth was appointed Director of Health Service Development for South Eastern Sydney Area Health Service and in 2005 was appointed Director of Population Health Planning and

Performance in the newly formed SESIAHS. In December 2007 Elizabeth was appointed Director of Clinical Operations for SESIAHS. In September 2010 Elizabeth was appointed Chief Executive of Sydney Children's Hospital Network.

**Elizabeth Chatham
CEO, Women's and Children's Hospitals Australasia (WCHA)**

WCHA is a widely regarded not-for-profit peak body whose vision is to enhance the health and well-being of women, children and young people. It achieves this by supporting member hospitals to aspire to excellence in clinical care by benchmarking, advocacy, and sharing knowledge and evidence underpinning best practice. Membership comprises the majority of the leading children's and women's hospitals and health services located throughout Australia and New Zealand. Elizabeth has been the CEO since 2008. Prior to this she held

the position of Clinical Director of The Royal Women's Hospital, Melbourne.

**Mrs Celena McGovern
Consumer**
